TECHNICAL SUPPORT
PETITION FOR THE
INCLUSION OF CERTAIN
REAL PROPERTY IN THE
NORTH LAKE RECREATIONAL
SEWER AND WATER DISTRICT

COMES NOW your Petitioner, Roddy L. Evans,
and petitions the Board of Directors of the North Lake Recreational
Sewer and Water District as follows:

I.

Your Petitioners are the owners of the real property situated
within the County of Valley, State of Idaho, particularly described in
Exhibit "A", attached hereto, and incorporated herein by reference.

II.

Your Petitioners are desirous that the above-described property
be included in, made or part of, and be served with any sewage
collection and/or drain facilities constructed by the North Lake
Recreational Sewer and Water District, Valley County, Idaho.

III.

Your Petitioners request that, in accordance with the provisions
of Section 42-3218, Idaho Code, notice of the filing of this petition
be given and published in Valley County, Idaho, said notice to give
all persons interested an opportunity to appear and show cause in
writing, if any they have, why this petition should not be granted at
the hearing, time and place to be set by this Board; that further,
assuming that no valid objections are made to the inclusion of the
above-described property within the boundaries of the North Lake

said North Lake Recreational Sewer and Water District, and that such order be filed with the Clerk of the District Court, Valley County, Idaho.

IV.

That your Petitioners are aware that, as a condition of annexation, the District may require that the land described in this petition be subjected to the following requirements:

1. The Petitioners shall pay for the actual costs incurred by the District for District administration, engineering, legal, inspection, and preparation of any necessary documents that are required by the District for annexation of the property. Such District costs shall include, but are not limited to, preparation of conditions of annexation, any needed sewer and water system master planning, design consultations, plan reviews, and final approval of the Petitioner's construction plans and specifications for sewer and/or water facilities.
2. The Petitioner shall be responsible for all sanitary sewer facilities that will be necessary to serve the Petitioner's annexed property. These sewer facilities will include those required within the annexed property as well as all necessary sewer facilities needed to extend sewer service from the District's existing facilities to those proposed to serve the annexed property. The District shall have the right to dictate where and how the Petitioner's sewer facilities that serve his annexed area may be connected to the District's sewer facilities. Upon completion of installation and approval by the District of all sewer facilities the Petitioner shall dedicate such facilities to the District.
3. The District shall not be obligated to serve any property annexed within the District where the District has determined there is not sufficient system capacity to adequately serve such property. There shall arise no right to service or obligation by the District for service upon annexation and as among other properties annexed to the District, and there shall be no priority for service until each sewer connection permit has been obtained. If construction is not completed within two (2) years from the date the sewer connection permit was issued, any priority for service shall become null and void. The District may extend the time for completion upon a request by the

property owner and a showing of good cause why such extension should be granted.

4. At the time each sewer connection permit is issued and prior to connection of the sewer system to each private facility, a service availability fee of no less than Three Thousand Four Hundred Dollars (\$3,400.00) per lot or equivalent dwelling unit shall be paid to repay the District for the cost of developing the District's core sewer collector lines, and treatment facilities including the debt retirement of such facilities committed to prior to inclusion of the annexed property into the District. Such service availability fees may increase at such time as the District determines such fees are not adequate to reimburse the District for the cost incurred in developing the sewer system. The service availability fee shall be in addition to actual costs required for connecting to the actual main sewer line.
5. And such other conditions as the District may prescribe.

WHEREFORE, your Petitioners pray that this petition be set for hearing at the earliest practicable time, and that the Board grant the petition including the conditions as set forth in Paragraph IV above.
